

Members on Warrington Well from 309 to 4117 , 309 to 307,304,3051 to 175 E and 309 to the Meadows. The water treatment has been completed. All water samples and tests show no Iron Bacteria and all routine samples and flushing's are showing normal.

The extra Clorine ,flushing's and water samples will continue until the end of April 2026.

Then routine Clorine samples and flushing's will return to Monthly as of May 2026.

Members that might still have water issues will need to have their hot water heaters drained and thoroughly flushed as well as all hot water faucets. Once the water heater has been flushed and is running clean, then flush all hot water faucets and clean any screens on the water faucets.

Please call the office if you have any questions.

Thank you for all your patience.

Michael Williams
